

Design & Build of an Executive Home

Client: Private Client
Location: Cossington, Leicester
Size: 5,500 ft²
Value: £1.1 Million

Project Detail: Design and build of a bespoke, highly specified, prestigious home.

This project was situated in a conservation area which attracted sensitive planning conditions and included the felling of protected trees, protection of newts and bat surveys.

The construction activities included concrete mini piles, reconstituted stone, under floor heating, smart power, data and server installation and a glass atrium providing natural lighting to the centre of the building.

The internal finishes were of a very high specification and standard, which included inbuilt wardrobes, a high end kitchen and individually designed bathrooms.
